

East Tennessee Section of AACE International Annual Technical Seminar

The East Tennessee Section of AACE will be hosting their semi-annual Technical Seminar next month April 14th, 2011 at Tusculum College on Pellissippi Parkway. This special session will feature Mr. Edward E. (Ted) Douglas, CCC, PSP, an Independent Construction Management Consultant based on Long Island, New York. His company ACTPMA, LLC specializes in helping projects get started, execute efficiently and complete successfully. Ted supports his clients nationally and internationally with construction management training and seminars, construction project oversight, as well as working with his clients to resolve construction claims and disputes. ACTPMA is an acronym for Accurate, Complete and Timely project Management Assistance. With over thirty years in the construction industry, Ted has a variety of project experience including: nuclear power plant construction, construction planning & scheduling, new and remedial facility construction, environmental remediation and D&D projects, engineering & construction project controls for TVA.

And exactly what is cost engineering you might ask? It promotes the planning and management of cost and schedules, and 75 Y-12 employees are AACE members. They use engineering judgment and experience in applying scientific principles and techniques to problems of cost estimating, cost control, business planning and management science, profitability analysis, project management, and planning and scheduling. Recognizing that the lifeblood of any organization is the people involved at the operational level, AACE International evaluates each local section worldwide to measure performance and accomplishment against an established standard.

In conjunction with this years Technical Seminar will be the annual AACE Golf for Cost Tournament which will be at the Egwani Farms Golf course. See
